

RECYCLING FOR FUNDRAISING

Program Information

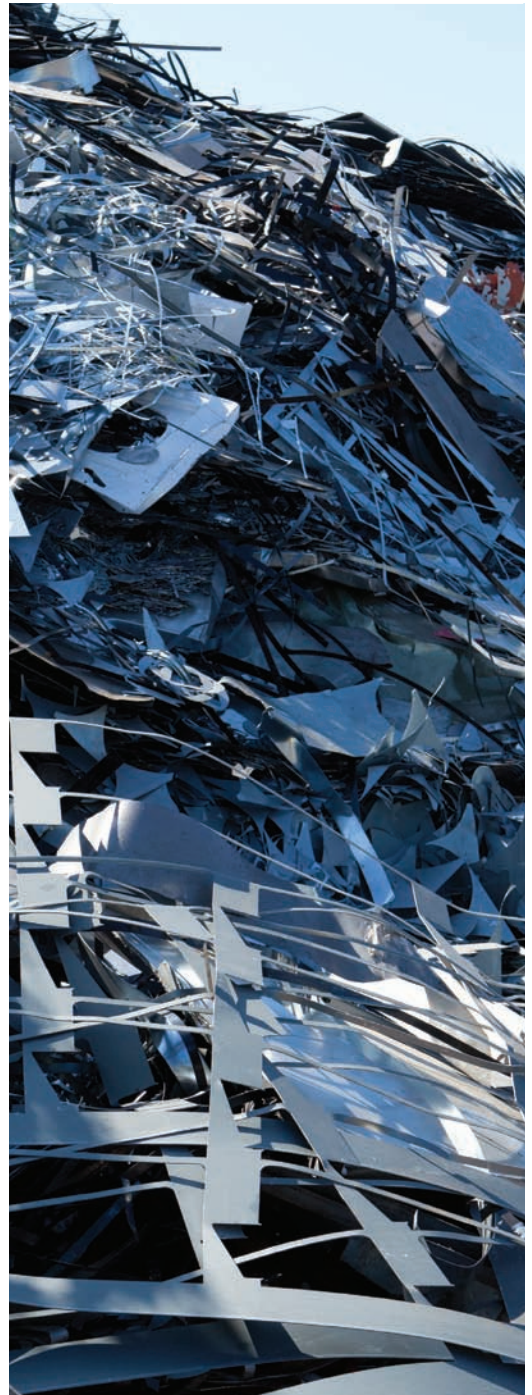

SR SADOFF IRON &
METAL COMPANY

THE PREFERRED CHOICE IN RECYCLING

Recycling for Fundraising

Mission

To provide local, not-for-profit organizations the opportunity to raise funds for their individual organizations while, at the same time, encouraging continual education, energy savings, and waste recovery through the recycling efforts of the individual members of the organization.

Company Information

Sadoff & Iron & Metal Company is a family-run business operating 8 scrap metal recycling operations within the Midwest. We have been doing business in the Fox River Valley for over 60 years. Our reputation as a premier, global, scrap metal processor serving the steel mill and foundry industries allows us to be competitive in the marketplace and has been established and fostered through our concern for business, industry, and the environment. Our customers have come to expect competitive pricing, customer service, and professionalism. We are committed to improving the communities where we work and live, and are proud to offer the opportunity for local not-for-profit organizations to raise funds, awareness and promote a healthy environment.

Program Benefits

Raise Money

Your organization will have the opportunity to raise funds, while being educated as to the value and savings gained through recycling.

Education

This opportunity allows participants to gain an understanding as to the true economical and environmental benefits of recycling.

Energy Savings

True energy savings of up to 75% can be realized through recycling, lowering the carbon footprint of communities and encouraging proper waste disposal.

Simplicity

We make it easy for your organization to earn money. Our company will work individually with your organization to develop a program that is best suited for you.

Recycling for Fundraising

Aluminum Recycling Facts

- Used aluminum beverage cans are the **most recycled item** in the U.S.
- Recycling one aluminum can saves enough energy to run a TV for three hours – or the equivalent of half a gallon of gasoline.
- More aluminum goes into beverage cans than any other product.
- It takes **95% less energy** to recycle aluminum than it does to make it from raw materials.
- A national recycling rate of **30% reduces greenhouse gas emissions** as much as removing nearly 25 million cars from the road.
- In one year, recycling allows aluminum companies to save the equivalent of more than 19 million barrels of oil – enough energy to supply electricity to about 18 million households for a year.

At Request

- Thank you for providing us with your organization's information, which will be used to create your account. Each time someone brings in scrap, they will need to reference the name on this account for their material to process under your organization.

Recycling for Fundraising

Program Explained

- With your help, Sadoff will determine our best suited location to serve your organization's needs; your account will be set at that particular location.
- Sadoff will provide your organization with clear plastic recycling bags for your membership. The intent of the bags is Aluminum Can Recycling Only, however other metal or steel materials can be brought in for credit to your account.
- 2 ways for collection.
 - Customized site collection
 - Member-initiated collection
- Sadoff has included a material acceptance policy in this packet; please familiarize your membership with materials that can and cannot be brought in.
- We can recycle more than just aluminum cans. One very important aspect of recycling is segregation, so group like metals with like metals.
 - Keep aluminum with other aluminum; do not commingle with steel, copper, etc ...
 - Separate materials, copper with copper, steel with steel, etc ...
- Each time someone from your membership or community recycles with Sadoff, all they need to do is let the scale operator in the office know that the material being sold is for your particular organization's account. After the transaction is complete, the value of the scrap sold will go directly to your organization's account where it will build until you request payment or your payment cycle comes due.
- Within this packet, you will also find information on common items that can be recycled with Sadoff.

To Members

<Member Name>
<Member Address>
<Member Address>

Dear Organization Member,

We are proud to invite you to participate in a program that will not only benefit our organization, but also benefit the planet on which we live. Our organization has partnered with Sadoff Iron & Metal Co. located here in Oshkosh, for the purpose of participating in a fundraiser for the benefit of our organization.

As of December 1, 2012 we have an account set up with Sadoff Iron & Metal Co. This account allows our organization the opportunity to gain fundraising dollars through the recycling of aluminum cans. Included with is letter is information about our recycling partnership. We are pleased to offer this program as an opportunity for our organization to act in an environmentally responsible way while earning money that will help fund programs produced by our organization.

If you have any questions, please feel free to contact Jason Lasky at Sadoff Iron & Metal Co. at 920.921.2070. Jason has offered to help us get our recycling program off the ground and has committed to providing replacement recycling bags for can collection.

Thank you for your commitment to the Fond du Lac Boys and Girls Club and for helping make our home a better place to live.

Sincerely,

John Doe
Fond du Lac Boys and Girls Club President
